

PRELIMINARY DRAFT

7.36 Advanced Neurophysiology

Lectures by Jerome Y. Lettvin, M.D.

Fall, 1984

(@J.Y. Lettvin)

Editors Note:

These lectures were transcribed from tapes made during lectures in the Fall of 1984. The transcript has NOT been read or approved by Dr. Lettvin, so undoubtedly, contains many transcription errors. Thus, it is important that the notes not be copied or made public in their present rough, unauthorized form. a few copies have been struck to assist in proofreading. Please return your copy, liberally inscribed with comments and criticisms, to the editor.
